Nic: Thx! We'd greatly appreciate your influence on other NDOW members on this request. We'd like to expedite - want to use vessel icon soonest - during Harvey ops.

Greatly appreciated!

Subject: [Non-DoD Source] RE: Response Manager Vessel Icon

I am good with it.

Subject: Response Manager Vessel Icon

Good afternoon NDOW reps,
I am in touch with Weston Solutions and would like to get everyone's approval/input on the creation of a new vessel icon in response manager. Currently there are only a few icons used to mark orphan containers and spills. The square with a black dot is pretty much an all purpose icon to mark everything and unless you click on each one, there is no way to tell if the icon is a vessel, facility, or spill.

That being said, Weston solutions is willing to create a "just in time" vessel icon in response manager (RM) which will help those in the ICP's with data collection and workload prioritization. Currently there are 963 targets of

interest of which 416 are vessels. We would like to be able to decipher which ones are vessels and which ones are other. Please use the voting button or just send me a reply. Thanks.
